PROFESSIONAL SUMMARY

Full Stack JavaScript Developer with hands-on experience building modern web applications using React, Redux Toolkit, RTK Query, Node.js, Express, and MySQL. Experienced in designing scalable authentication systems with JWT, Refresh Tokens, Email Verification workflows, protected routes, and role-based application structures. Skilled in creating responsive user interfaces, dashboard systems, API integrations, and maintaining clean .project architecture

TECHNICAL SKILLS

Frontend • React.js • Vite • Redux Toolkit • RTK Query • React Router • Tailwind CSS •

Framer Motion • Responsive Design

Backend • Node.js • Express.js • REST APIs • JWT Authentication • Refresh Token Systems

• Email Verification Systems • Cookie-Based Authentication • Middleware Architecture

Database & Services • MySQL • Firebase • Firestore • Cloudinary

Tools • Git • GitHub • GitHub Pages • Postman

PROJECTS

(Authentication System (React + RTK Query + Node.js + Express

Built complete authentication workflow with Signup, Login, Logout, and Protected Routes. • •

Implemented Access Token and Refresh Token authentication strategy. • Developed Email

Verification flow with verification links and resend verification functionality. • Added secure cookie-based authentication handling. • Designed verification page with countdown timers

and account verification states. • Integrated RTK Query for API communication, loading

states, and error handling. • Structured backend using Controllers, Services, Middleware,

.and Route separation

Admin Dashboard

Full CRUD operations (Create, Read, Update, Delete). • Data management panels with •

reusable components. • State management using Redux Toolkit. • API integration using RTK

.Query

Personal Portfolio Website

Built with React and Vite. • Hosted on GitHub Pages. • Responsive design with project •

.showcase and contact section

Multi-Language & Multi-Theme Application

Language switching system. • Theme management using Redux Toolkit. • Scalable state •

.architecture

Landing Page Application

Skeleton loading implementation. • Dynamic data fetching using RTK Query. • Optimized •

.user experience and loading states

Backend API System

Node.js and Express architecture. • MySQL database integration. • RESTful API design. • •

.Cloudinary image upload support using FormData

CORE COMPETENCIES

Authentication & Authorization • JWT & Refresh Tokens • Email Verification Systems • •

REST API Development • State Management • Database Integration • Full Stack Application

Development • Clean Architecture Principles • Responsive UI Development
